ChangingEmployment

Tuesday 24 November

Annual colloquium 3 “Research Findings” (All Partners invited to attend)

Venue: [University of Strathclyde, Collins Building](#) (Richmond Street), Scottish Universities Insight Institute

Structure for the individual presentations:

Each presentation should be 12-15 minutes. It should focus on the current stage of the PhD project, emerging puzzles, difficulties, analytical dead-ends. The idea is to put forward analytical questions and dilemmas that emerge out of individual collected materials / work, and contextualize it in the research findings. It is an opportunity to openly discuss difficulties and pose questions, rather than present answers.

The will be followed by:

- 5 minutes – student discussant 1
- 5 minutes – student discussant 2
- 5 minutes – supervisor discussant
- 15 minutes – open floor questions

See table within programme for proposed discussants for each presentation. In advance and to allow discussants to prepare each ESRs are being asked to prepare a paper (max 4 pages). The papers should be submitted by **Friday 30 October** these will be circulated to discussants on **Monday 2 November**. The discussants commit to reading the assigned papers before the colloquium.

B.3.2. Network-wide training events, schools, conferences, workshops

(i) Network-wide training activities

Network-wide training activities are described in Table B.3.3. There are two main types of events: **Network Schools**: comprising **7 days** of core and optional courses (unless otherwise specified the speakers included are the ITN-based scholars); and **Annual Colloquia**: comprising **3 full days** each and involving the participation of each ESR and ER, academic partners and one representative of each Associated Partner providing feedback on ESR project progress.

Annual Colloquium Year 3 (AC3) in Strathclyde (Month 36): Research findings

(Responsible partner: Strathclyde, prepared in cooperation with ER2 and ER3). AC3 will give ESRs and ERs an opportunity to obtain

critical feedback on their research findings both from the Training Group and from business and non-governmental APs.

B.4.3. Management structure, organisation and procedures

(iv) Other roles

A **Steering Group** (all Full Network Participants, supervisors, ERs, Associated Partners) will be invited to each Annual Colloquium. For the three year duration of the ESR training, this group will provide a monitoring and advisory role on the progress of the ESRs and provide feedback directly to ESRs and supervisors as well as being invited to submit more formal input to the Supervisory Board regarding the operation of the Network. This Group, which will consist of a significant number of practitioners and policymakers, will also provide a crucial disseminating role within their respective networks following the Annual Colloquia (e.g., of project e-newsletters, publications).

~ B.5.3. Outreach activities

1. Dissemination training - One session at each AC will be devoted to presentations of the dissemination activities of the ESRs and ERs over the previous period, and to a discussion of improving their effectiveness.
